Register for a free speech and language screening for your child. The screening will assess your child's development according to their age. While each child develops communication, motor, and behavioral skills at individual rates, there are specific milestones that indicate age-appropriate growth. Addressing any delays in their development in the early years will greatly benefit them in later years.

Parents will receive a confidential report detailing their child's progression toward age-appropriate goals and development. If recommended by the therapist, weekly speech and language sessions will take place at Bright Beginnings with approval from the parents' insurance company.

Return this form to your child's teacher as soon as possible!
